**Subject:** Microsoft Settlement

The proposed settlement with Microsoft is bad. At best, it is a slap on the wrist. At worst, it rewards them for harmful business practices, for which they have shown no understanding that they have done anything wrong. They need to learn the error of their ways, having been proven to be a monopoly despite their best efforts to sabotage the legal process, with lying on the witness stand, in deposition, and with falsifying evidence in court. This proposed settlement will make a mockery of any claims to support the ends of justice. We deserve a real settlement, not this.

Sincerely,  
Michael House
